Nursicon humbly presents-“**Hot Girl Fever**”
Life Coaching-Body Transformation

ELECTIVE SURGERY CAN BE LIFE CHANGING!!!

6 Reasons why people have plastic surgery:

1. Feel better about themselves.
2. Improve their appearance.
3. Correct a physical imperfection
4. To boost their confidence
5. Conform to Societal Standards
6. Make themselves feel younger.

PRO'S

- Increase in confidence
- Financial benefit
- Health benefits
- Improved emotional state
- Enhanced relationships

CON'S

- Negative relationship outcomes
- Financial Strain
- Complications
- Failed satisfaction with results
- Feelings that surgery revealed additional need for surgery.

OUR OBJECTIVE

To promote Mental wellness by
coaching one to Align self-
perception with their Surgery Goals
(personal and professional).

SURGERY STATISTICS

Women between the ages of 35 and 50 account for 43% of total surgical procedures performed. 92% of all cosmetic surgeries are performed on Women. (The ASAPS statistics). One poll showed that 65% of people regretted their surgery d/t complications or not having the desired appearance.

SOCIAL MEDIA

Social media can affect body image in complex and multifaceted ways. It's important to be aware of these potential effects and to use social media mindfully.

Social media can create a toxic culture of comparison and competition, where individuals compare their bodies to others and strive to meet the same beauty standards. (Psych Central 2/27/23).
